

Avoid bottled water!

Over 150 billion litres of bottled water are consumed every year on the planet. Most bottles end up at the dump. Instead of increasing the amount of garbage to recycle, opt for drinking water from the tap. It's less expensive than bottled water. And choose reusable containers.

Your green action: Organise a green brigade at the beginning of the school year.

Your work will consist in presenting green capsules to students. To do so, you can prepare playlets in order to raise students' awareness on how to positively impact the environment.

To keep your public's attention, don't forget to:

- ✓ Be well prepared
- ✓ Bring interesting material along
- ✓ Be dynamic
- ✓ Have a clear and precise message
- ✓ Look at your audience and have good posture
- ✓ Speak at a proper speed and appropriate volume

- Sorting garbage
- Composting
- Reuse and durability of objects
- Eco-friendly lunch boxes
- Etc.
