

## Original jewellery

Recycle old computer keyboards by inventing objects using the letter keys. You could make necklaces, rings, even games out of them.

### How?

1. Remove the bottom of the keyboard.
2. Take the keys out, one at a time.
3. Saw the plastic under the keys.
4. Wash the keys using dishwashing liquid.

### You could make:

- A necklace

Choose the letters that spell out your first name. Pierce two holes through which you can thread some string.

- A ring

Use hot glue to stick a key onto a ring.

- Earrings

Insert a key into an earring.

- Invent a Scrabble-type word game using many keyboards.
